

# Bureau Veritas Learning Academy

## Live Virtual Classrooms

Interactive learning experience without borders

### What is a virtual classroom?

Virtual classrooms are an online tutor led training room which allows us to train people anywhere in the world as if they were all in a room together.

### What is the difference between a virtual classroom and an eLearning course?

The difference is that the virtual classroom course is led by a real tutor and is live. The delegates can ask questions and interact with the tutor and the other delegates. The platform allows for workshops, exercises, polls, videos, audio, documents, tutor webcam and games to be shared with the delegates making the experience immersive and interactive

### Benefits

- Organizations who orders the training can ensure consistency of training across their workforce
- There are significantly reduced travel and accommodation costs for delegates
- The virtual classroom courses are cheaper than in house courses
- Training can be undertaken on mobile devices (smartphone / tablet)
