

RELIABLE ELECTRIC VEHICLE CHARGING (EVCS) STATIONS (EVCS)

With ChargeScan by BV, we are contributing to the acceleration of the transition toward greener transportation by providing services throughout the asset lifecycle, from construction to operations.

We conduct site assessment, design and permitting support, construction management assistance and commissioning

We assure availability through condition monitoring and data verification

We ensure end-user safety and protect the power grid through cyber security assurance

We act as a third party to ensure full regulatory compliance with applicable norms, standards and legislation

We manage, model and analyze data to optimize charging point performance
